**Appendix to report No. GRS20xx-xxxxxx**

GRS Laboratories examined a 1.54 ct natural spinel, described in report number GRS2xxx-xxxxxx1, that exhibited very good brilliancy and ideal proportions, making it worthy of receiving the GRS brilliancy designation of “vibrant”.

“Vibrant” is an attribute given to gemstones that display a high amount of color reflection – as opposed to the separately considered category of color saturation. A “vibrant” appearance is achieved through the skillful cutting of a gemstone to its optimal proportions, resulting in greater-than-usual weight loss and a maximized reflection pattern.
